**STATEMENT UNDER 37 CFR 3.73(b)**Applicant/Patent Owner: Gerald Walter Fischer, Richard F. Schuman, Hing Wong, and Jeffrey R. StinsonApplication No./Patent No.: 6939543B2 Filed/Issue Date: September 6, 2005Entitled: OPSONIC AND PROTECTIVE MONOCLONAL AND CHIMERIC ANTIBODIES SPECIFIC FOR LIPOTEICHOIC ACID OF GRAM POSITIVE BACTERIABiosynexus Incorporated, a Corporation
(Name of Assignee) (Type of Assignee, e.g., corporation, partnership, university, government agency, etc.)

states that it is:

1. ☒ the assignee of the entire right, title, and interest; or
2. ☐ an assignee of less than the entire right, title and interest.
(The extent (by percentage) of its ownership interest is _____ %)

in the patent application/patent identified above by virtue of either:

- A. ☐ An assignment from the inventor(s) of the patent application/patent identified above. The assignment was recorded in the United States Patent and Trademark Office at Reel _____, Frame _____, or a true copy of the original assignment is attached.

OR

- B. ☒ A chain of title from the inventor(s), of the patent application/patent identified above, to the current assignee as follows:

1. From: Gerald Walter Fischer et al. To: Sunol Molecular Corporation
The document was recorded in the United States Patent and Trademark Office at Reel 011412, Frame 0597, or for which a copy thereof is attached.
2. From: Gerald Walter Fischer et al. To: Henry M. Jackson Foundation for the Advancement of Military Medicine
The document was recorded in the United States Patent and Trademark Office at Reel 011412, Frame 0614, or for which a copy thereof is attached.
3. From: Sunol Molecular Corporation and Henry M. Jackson Foundation for the Advancement of Military Medicine To: Concurrently Herewith to Biosynexus
The document was recorded in the United States Patent and Trademark Office at Reel _____, Frame _____, or for which a copy thereof is attached.

☐ Additional documents in the chain of title are listed on a supplemental sheet.

- ☒ As required by 37 CFR 3.73(b)(1)(i), the documentary evidence of the chain of title from the original owner to the assignee was, or concurrently is being, submitted for recordation pursuant to 37 CFR 3.11.

[NOTE: A separate copy (i.e., a true copy of the original assignment document(s)) must be submitted to Assignment Division in accordance with 37 CFR Part 3, to record the assignment in the records of the USPTO.]

The undersigned (whose title is supplied below) is authorized to act on behalf of the assignee.

LICENSE AGREEMENT

THIS LICENSE AGREEMENT (this "Agreement") is made and entered into effective for all purposes and in all respects as of the 24th day of May, 1999 (the "Effective Date"), by and among (i) HENRY M. JACKSON FOUNDATION FOR THE ADVANCEMENT OF MILITARY MEDICINE ("Foundation"), a tax-exempt Maryland corporation, (ii) SUNOL MOLECULAR CORPORATION ("Sunol"), a Delaware corporation, and (iii) BIOSYNEXUS INCORPORATED ("Biosynexus"), a Delaware corporation.

6. PATENT FILING, MAINTENANCE AND ABANDONMENT.

6.1. Beginning with the Effective Date, Biosynexus, at its own expense, shall prepare, file, prosecute and maintain U.S. and foreign patent applications and patents for the exclusively licensed Licensed Patent Rights (as referenced in Exhibits A-1, B and C-1), and as a result, Biosynexus shall have control over such exclusively licensed Licensed Patent Rights. Biosynexus shall consult with the respective licensor (Foundation, SJ Group or Sunol, as the case may be) with respect to such preparation, filing, prosecution and maintenance to the extent such consultation is reasonably practical (but in all events Biosynexus shall notify the appropriate licensor of such preparation, filing, prosecution and maintenance). The Foundation and Sunol, as applicable, will pay the cost of preparing, filing, prosecuting and maintaining U.S. and foreign patent applications and patents for, and thus will have control over such non-exclusively licensed Foundation Patents Rights and Sunol Patent Rights (as referenced in Exhibits A-2 and C-2) for the three (3) year period commencing as of the Effective Date. The parties hereto agree to cooperate in the preparation and execution (or cause their authorized agents to prepare and execute) all documents, instruments or other agreements reasonably necessary to enable the responsible party to apply for, to prosecute and to maintain the Licensed Patent Rights. Foundation, the SJ Group and Sunol, respectively, shall provide to Biosynexus, and Biosynexus shall reciprocally provide such parties with prompt written notice as to all matters which come to its attention and which may affect the preparation, filing, prosecution or maintenance of any such Licensed Patent Rights.

IN WITNESS WHEREOF, the parties hereto have executed this License Agreement as of the date first above written.

IN VITRO METHODS

Serial Number 08/466,059 (20-02) – In Vitro Methods for Identifying Pathogenic Staphylococcus, for Identifying Immunoglobulin Useful for the Treatment of Pathogenic Staphylococcus Infections and In Vitro Methods for Employing Such Immunoglobulin

Gerald W. Fischer (VSI)

New application filed on 6/6/96; initial patent application filed on 10/22/90 (which was abandoned)

This patent application describes staphylococcal antigens that induce broadly reactive opsonic antibodies to both coagulase positive and negative staphylococci. Claims for such antigens may be useful in diagnostics and of value in vaccine constructs.

SJ Group Patent Rights - Exclusive License

Opsonic and Protective Monoclonal and Chimeric Antibodies Specific Lipoteichoic Acid of Gram Positive Bacteria

Fischer, Schuman, Wong, Stinson, VSI and Sunol

Filed June 16, 1997; Serial #60/049,871

This application describes a monoclonal antibody (MAB) that is directed against LTA and provides enhanced protection passively for S. aureus and S. epidermidis in animals. Thus epitopes on LTA may induce protection against staphylococci. In addition this MAB binds to other gram positives such as group A streptococcus and enterococcus. The peptide mimic that binds to this MAB is claimed. Peptide mimics of LTA could be very useful for development of vaccines to gram positive bacteria, since LTA is considered a key component for binding of gram-positive bacteria to epithelial cells. Foundation owns a fifty percent (50%) interest in this technology.

EXHIBIT C-1
TO
LICENSE AGREEMENT

SUNOL Patent Rights - Exclusive License

Exclusive basis:

A human single-chain antibody library consisting of the following: the specific collection of filamentous phages carrying human single-chain antibody fragments that were constructed with RNAs derived from the human spleen cells provided by the Uniformed Services University of the Health Sciences. This collections of phages was used in an in-vitro panning protocol to successfully isolate single-chain antibody fragments recognizing staphylococcal antigens.
